

TriLink is proud to encourage the development of our industry through a program that provides materials needed to push the frontiers of our science. The ResearchRewards Program targets educators and academic researchers who need additional reagents to teach basic concepts or supplement their primary funding.

ResearchRewards are for a maximum of \$10,000 and are to be used to purchase TriLink Products. Each award is valid for two years and is eligible for renewal. In return, TriLink may publish the awardee's name, institution, and general area of study on [www.trilinkbiotech.com](http://www.trilinkbiotech.com) or other promotional literature. TriLink also requests to be credited as a sponsor where appropriate, and reserves the right of first negotiation to any commercially usable results in our area of business.

To apply, please email this completed application to [sales@trilinkbiotech.com](mailto:sales@trilinkbiotech.com). The ResearchRewards review committee consists of TriLink scientists and executives. All application information submitted will remain completely confidential. Please contact the Product Management Department at (858) 546-0004 for further details.
